

CS-4.1 Code Scanning Vulnerability Threshold Achieved

Status: Draft

Control Objective

- Ensure that the company's people, processes, and technology systems are prepared to perform secure software development.
- Protecting all components of the company's software from tampering and unauthorized access.
- Producing well-secured software with minimal security vulnerabilities in its releases.
- Enforce a minimum number of defects per system within the company.

Control Validation

- Software applications that are scanned with the company's approved scanning tools must adhere to existing vulnerability SLA timelines, which can be found here: [Vulnerability SLAs](#).
- Software applications that are scanned with the company's approved scanning tools must have 0 new Critical or High vulnerabilities added after they start scanning. If any exist, they must be fixed, mitigated, or have a risk exception created for them.
