

VM-1.1 DAST Scan Report

Status: Draft

Control Objective

- Ensure that the company's people, processes, and technology systems are prepared to perform secure software development.
- Protecting all components of the company's software from tampering and unauthorized access.
- Producing well-secured software with minimal security vulnerabilities in its releases.
- Ensure that all web applications that are DAST-scannable are scanned by an approved DAST scanning tool.
 - Ensure that all web applications have full scan coverage of API routes or webpages with an approved DAST scanning tool.

Control Validation

- Software applications that have web APIs or webpages must be scanned with the company's approved DAST scanner before software is released.
 - DAST-scannable applications have full scan coverage of all scannable API routes or webpages.
- Software applications that are DAST-scannable must provide a report showing coverage of API routes or webpages with an approved DAST scanning tool before software is released.
